

ROTOMETRICS

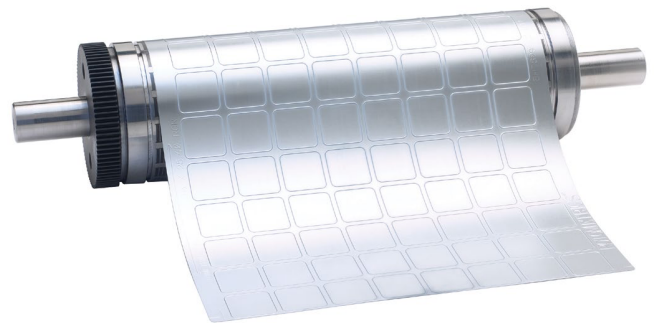

## Flexible Die Portfolio

## The Right Die for Every Application

With nearly 70 years of Rotary Die and Support tooling expertise, leveraging our global manufacturing power across five continents and the proprietary technology across three leading rotary die manufacturers, (RotoMetrics, Electro Optic and MLC Brazil), we offer the most comprehensive flexible die portfolio in the industry.

Our flexible die portfolio allows you to choose the features that are most important to you. Whether for short run jobs, digital applications, thin film applications or running abrasive materials, we have a solution for every die cutting requirement. In addition, we offer exclusive in-house coating solutions for our dies and magnetic cylinders that allow you to run more efficiently with greater output and less build up.

With our global team of engineers and local service and support staff in the places you do business, we offer the largest footprint, fastest lead times, and widest range of dies in the industry. Contact us today to find the right die to help you run better, faster and smarter.

### Key Features & General Specifications

- Best in class die cutting technology
- Tightest tolerances
- Exclusive in-house coatings
- Exclusive manufacturing processes for consistent blade levelness
- Vertically-integrated manufacturing for highest quality
- Easy online ordering with [MyRoto.com](https://MyRoto.com)
- Same-day shipping
- Local service and support for flexible dies and related products

### Product Applications:

*Papers including Standard, Abrasive, Laminated  
Films including Standard, Abrasive, Thin  
Thermal Transfer applications  
Digital Die Cutting applications  
Specialty Folding Carton applications  
RFID Labels*

### Performance Coatings:

*RotoRepel™ and FDA-approved RotoRepel™ Rx  
Laser Hardening  
Rust Inhibitors  
Durability Coatings for Longevity*

# RotoMetrics Flexible Die Portfolio

## AccuSmart

the smart flexible die solution for short runs of simple paper and film materials

## DuraLine Special

technology combining sharpness and proprietary durability coatings for abrasive films, optimizing die life

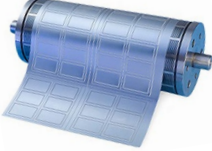

## AccuPrime

versatile clean cut / clean die strike solution to precisely cut a wide range of paper, laminated paper and film materials

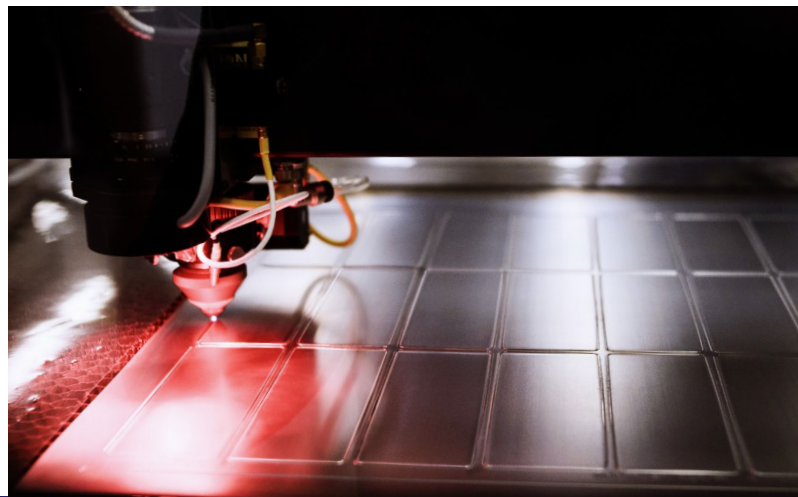

## GoldLine Special

unmatched die strike quality for the thinnest films running on the widest presses at the fastest speeds

## DuraLine

with proprietary coating techniques adding durability and longevity for long running jobs, abrasive materials, and thermal transfer applications
